## DIRECTORY OF ILLINOIS LIMESTONE AND DOLOMITE PRODUCERS

W. L. Busch

The following directory of Illinois limestone and dolomite producers lists some 240 operations and over 180 different companies or individuals operating in 61 counties throughout Illinois.

The directory was compiled from the most complete information available at the time of listing and gives, where possible, for each operation the name of the operating company or individual, the mailing address, the name or number of the quarry, the name of the county in which the quarry is located, and the approximate location within the county according to distance and direction from the nearest town.

Stone quarries in Illinois have grown in size and number to supply the demand for stone products throughout the state. In northeastern Illinois, which includes the Chicago district and areas to the south and west, large operations not only supply stone for local markets, but also ship stone to more distant points in Illinois. In the northwestern section of the state, many small producers supply local markets. In the area around and to the south of East St. Louis, a number of quarries supply important amounts of crushed stone for the large and growing markets in that locality. The eastern and southeastern parts of the state have few producers of stone, and most of the operations are relatively small.

This directory is being published because frequent requests for information concerning the location of Illinois quarry operations are received by the Illinois State Geological Survey. Stone operators and other interested groups can assist in keeping the listings up to date by sending to the Survey any corrections or deletions they might have and by supplying additional information of the kind furnished by the directory.

## ILLINOIS LIMESTONE AND DOLOMITE PRODUCERS

| Producer                       | Mailing Address                                 | Description of Operation |                                 |
